

**If the Crude Oil Export Ban Is Lifted in 2015:
10,219 Supply Chain Jobs Created by 2018
In the State of Wisconsin**

State and U.S Jobs and Growth by 2018 with the Export Ban Lifted		
	Jobs	Annual GDP Growth
State of Wisconsin	10,219	\$1.3 billion
Total U.S.	440,000	\$64 billion

Lifting the ban on U.S. crude oil exports this year would create **10,219 new supply chain jobs** in the State of Wisconsin by 2018. Additional 2018 Wisconsin state and local tax revenues generated by crude oil exports from the state’s supply chain businesses and workers will amount to \$168 million.

Supply chain companies and workers produce and supply construction, equipment, materials, technology, logistics and services to some aspect of crude oil and natural gas operations. They are not oil and gas producers. Supply chain companies are predominantly small, and the jobs are primarily in the skilled trades, such as equipment operators and mechanics, factory workers, construction workers, welders, truck drivers, and process technicians. The jobs and businesses exist in all fifty states, not only in energy producing areas. For example, engineering services provided by a Wisconsin firm may be used to design a new well complex in Ohio or Oklahoma. While the energy supply chain is a very broad and diverse cross-section of Main Street American businesses and workers, all members share one thing in common: their jobs ultimately depend on energy production. Increased crude oil production for export will enhance their lives and the prosperity of their families and communities.

Here are the energy supply chain sectors operating in the State of Wisconsin, and the number of jobs created in the state by 2018, if the export ban is lifted in 2015:

Construction and Well Services	-16	-923,126
Information Technology	175	13,289,401
Logistics	319	25,526,931
Machinery and Equipment	4,988	695,180,372
Materials	3,606	482,127,017
Professional, financial, and other services	1,148	94,804,922
Total	10,219	1,310,005,516

The diagram below depicts the six major supply chain sectors and the individual industries comprising each.
